CARBOXY SKIN: RESULTS ARE IN

ABOUT CO2LIFT® PRO CARBOXY GEL

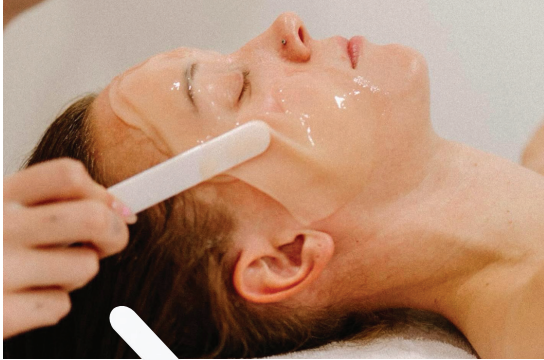

CO2Lift® is an in-office and at-home treatment that acts as a topical “hyperbaric oxygen chamber” for the skin, delivering a rush of carbon dioxide to the application site. Treatment time is approx. 45 min – 1 hour.

HOW IT WORKS

Carboxytherapy is the use of carbon dioxide (CO2) to regenerate the skin. When the gas is delivered through the gel to skin, the body responds by rushing oxygen rich blood to the tissue, (the Bohr Effect principle) leading to an induction of new collagen, tissue regeneration, and increased oxygenation and microcirculation.

HOW TO USE

- Recommended to do a series of 3 treatments within 1 week as a loading dose.
- Maintain with 1-2 treatments monthly.
- Can be combined pre- and/or post- any aesthetic procedure: facials, dermaplaning, chemical peels, microneedling, injectables, energy or laser treatments, surgical procedures.

PREVIOUS CLINICAL RESULTS

INCREASE HYDRATION BY 117%
compared to baseline
post treatment for up to 3 weeks.¹

100% RE-EPITHELIALIZATION or
complete healing within 1
month for 10 diabetic ulcer patients.²

REDUCED DOWNTIME,
speedy healing, improved
clinical outcomes, and
higher patient satisfaction.³

IN A RECENT CLINICAL TRIAL, AFTER 6 TREATMENTS⁴

39% Luminosity
42% Radiance

30% Sagging
27% Pigmentation

24% Fine Lines
20% Wrinkles

26% Elasticity at W4
28% at W10

Week 1: 3 treatments, Weeks 2-4: 1 treatment each
